

## Features and Benefits

### Snow Pushers

#### SSP15 & SSP25 Series

Features	Benefits
<b>Universal quick attach hitch</b>	Quick and easy to hook-up. Fits skid steers and tractor loaders with a universal quick attach hitch.
<b>Hitch frame is angled forward</b>	Allows operator to rotate front of Snow Pusher higher for pushing snow up a snow pile. Can build higher snow piles with this design.
<b>1/4" &amp; 5/16" Heavy side panels</b>	Built heavy to handle the tough jobs.
<b>Low profile exterior bracing on side panels and back</b>	Reduces snow build-up on the moldboard and side panels. Reinforces side panels and back for a stronger unit.
<b>1/4" Backing bar at blade mount</b>	Makes for a strong moldboard.
<b>Skid shoes are constructed of AR400 steel</b>	Gives a greater wear life.
<b>Z shaped steps</b>	Allows snow to fall out of steps and helps prevent ice to build up.
<b>Two year warranty</b>	Built to last.
<b>Reversible skid shoes</b>	Skid shoes wear faster at the leading edge. Skid shoes that can be reversed will last longer than nonreversible skid shoes.
<b>Replaceable skid shoes</b>	Protects the side panels from wear.
<b>Adjustable rubber snow blade</b>	The blade can be adjusted down as it wears to extend its life.
<b>Reversible rubber and steel blades</b>	The blades can be reversed to extend their life.
<b>Pull back with rubber blade</b>	Used to pull snow away from garage doors.
