

MP10 & MP20

| Features | Benefits |
|--|--|
| Bolted steel frame | Easy to replace individual components. |
| Adjustable 3-point Cat. I hitch | Can adjust leading plow share to operate next to the furrow on many different tractors. |
| Replaceable wear components | High wear components (plow share, shim, moldboard, landslide, and optional coulter can be individually replaced as they wear to help keep maintenance cost down. |
| Shearbolt protected plow bottoms | Protects structural integrity of each plow bottom. |
| Park jack with MP10 model | Single bottom plow won't fall over. |
| 14" coulters (Optional) | Breaks ground ahead of the moldboard so that the plow can pull easier and cuts trash to help keep trash from wrapping around and building-up on the plow shank. |
| MP top link extension (accessory) | Allows greater range of adjustment for tractors with short top links. |
