

## Features and Benefits

### Compact Drills

#### 706NT & 1006NT Model

Features	Benefits
<b>High Transport Clearance</b>	Can go anywhere your tractor can pull it without gouging or bottoming out.
<b>Large Inline End Wheels</b>	Unmatched ground gauging in rugged terrain. Inline end wheels minimize side loading on contours and side-hills, dramatically extending the life of the no-till openers.
<b>Standard Main Seedbox With 2.4 Bushels Per Foot Capacity</b>	The optional small seeds box and either a native grass seedbox, a fertilizer box, or a second seedbox can be added to the standard main seedbox.
<b>Seed Level Indicator</b>	Easy to read from the tractors seat and indicates the amount of left.
<b>4 Speed Gearbox For Various Seed Rates</b>	Makes seed rates changes quick and painless.
<b>Automatic Clutch</b>	Disengages when the drill is lifted for making end-row-turns.
<b>Wide Seed Cups</b>	Delivers the rate you choose, evenly and gently whether the seed is small, large, or fragile.
<b>Calibration Crank</b>	Makes it easier to calibrate. Eliminates need to jack up the drive tire to calibrate.
<b>Grease Bank For Coulter Pivots</b>	Makes it easier to lubricate coulter pivots frequently.
<b>Rain-Tight Lids</b>	Provides maximum seed and fertilizer protection.
<b>Lock-out Hub</b>	Disengages all drive components for reduce wear on drive system when transporting.
<b>Safety Lighting</b>	Makes it safer to transport.
<b>Acrometer</b>	Indicates the acres planted.
<b>Six-Position Adjustable Hitch Height</b>	Adjusts to your tractor's hitch height to keep the drill level in planting position.
<b>Standard Weight Brackets</b>	Can add standard tractor weights to the weight brackets for even better penetration in tough no-till conditions.
<b>Folding Tongue Option</b>	Folds the tongue in half to use less storage space.
