

## EA20

Features	Benefits
<b>Optional auger mounts</b>	Fits a wide range of Kubota excavators with a mechanical quick attach coupler or wedge type quick coupler mounted on the end of the excavator arm. Easy hook-up and unhook capabilities. Excavator boom & arm can be used to apply additional down force.
<b>Optional cradle</b>	Supports the auger while traveling. Keeps the auger from swing erratically. Allows the auger to be carried low without hitting the ground or other protrusions.
<b>Maneuverability</b>	Excavator Augers are able to reach over fences or other obstructions.
<b>Planetary gearbox</b>	Gearbox is completely sealed with all moving parts running in oil for constant lubrication.
<b>Patent pending vertical indicator</b>	Indicates when auger is vertical, makes it easier to drill straight vertical holes.
<b>2" Hex output shaft</b>	High torque resistance.
<b>Choice of three drive motors</b>	Three flow ranges: 6-15 gpm, 10-20 gpm, and 15-30 gpm Covers a wide range of Kubota excavators.
<b>Hydraulic hoses routed out top of motor/gearbox housing</b>	Allows motor/gearbox housing to follow auger into hole and dig a deeper hole without damaging hoses.
<b>Large selection of augers</b>	Variety of Dirt, Tree, and Rock Auger sizes and styles to suit many applications.
<b>Replaceable hardened steel pilot points on dirt augers</b>	Hardened points will last longer than non-hardened. Points are replaceable. Fish tail tips and steel point make it easier to start a hole.
<b>Replaceable carbide pilot points &amp; teeth on rock augers</b>	Points are designed for cutting through rock and are replaceable.
Accessories	
<b>Large selection of bolt-on rock heads</b>	Pengo Dirt Augers can be converted to Rock Augers with this accessory.
<b>Two auger extensions</b>	Available in 2 lengths (24" & 48") Increases the depth of hole the auger can dig by 24" or 48".
<b>Puff auger</b>	Used for drilling 2" rock T-post holes in tough conditions.
