

### HB74 & HB84 Hopper Brooms

Features	Benefits
<b>Available in 74" ( 1.88m) and 84" (2.13 m) working widths</b>	Provides for excellent productivity and ideal sizes for most skid steers and compact utility tractors.
<b>Connect under pressure hydraulic couplers</b>	Coupler are easier to connect and disconnect under pressure.
<b>Direct drive motor</b>	Improves efficiency.
<b>Forward and rearward travel</b>	Broom can operate while traveling forward or backward. Gutter broom must be shut off when operating backward.
<b>26" (66 cm) Bristle diameter</b>	Provides for long service life.
<b>Choice of poly, wire, or combination poly/wire bristles</b>	Allows owner/operators to meet operational needs. Poly/wire combinations provide more wear life and more aggressive sweeping action.
<b>Easily removable brush drive</b>	Allows for quick and easy change out of wafers. If included, only case drain hydraulic line must be disconnected.
<b>Adjustable broom hood</b>	Broom hood can be adjusted down as the bristles wear to extend the life of the broom.
<b>Reversible &amp; replaceable cutting edge</b>	Increases cutting edge life and can be replaced when worn out.
<b>Compatible with 12- 25 gpm (45-95 Lpm) hydraulic flow</b>	Allows attachment to a wide range of skid steers.
<b>Up to 230 rpm brush rotation</b>	Provides for good sweeping action and material control.
<b>Rubber dust deflector flap</b>	Helps keep dust levels under control and down and under the broom hood and out of the operators field of vision.
<b>Optional gutter broom</b>	Makes it easier to clean curbs and along side buildings. Adds 12" (30.5 cm) to the cleaning width.
<b>Optional dust suppression kits</b>	Wets the dust before sweeping it to help keep airborne dust down to a minimum.
