

CA05 Series Core Aerators

Features	Benefits
Pull Type Clevis Hitch	Fits behind any small tractor, lawn tractor, utility vehicle, or ATV with a pull tongue.
3 Sizes 40", 48" & 56"	Great sizes for home owners and other light applications.
Formed 10 Ga. end panels and center supports	Offers good strength and appearance.
Formed 12 Ga. weight tray with drain holes	Adds safety over spoon area, doesn't allow foreign weight object to fall into spoon area, keeps cores from being thrown forward.
16 Ga. x 1/2" I.D. hardened spring steel spoons with beveled edge	Penetrates the ground easier than spoons constructed of a heavier gage material and/or larger diameter bodies.
Individual Spoon Replacement	Requires removal of only two bolts to replace a worn-out spoon. Don't have to disassemble the whole rotor section to get to the spoons.
Gang greasing	Each gang has a grease zerk for smooth rotation.
8 1/2" Spoon spacing (forward travel) 4" Spoon spacing laterally	Offers optimum core pulling pattern & aeration.
4.2 Aeration cores per sq. ft.	Provides good aeration per square foot.
Weight tray	Additional weight can be easily added to the aerator.
