

GR1525 Model

Features	Benefits
Quick Hitch compatible	For quick and easy attachment.
10" Digging depth	A good depth below the ground. Removes base of most trees.
Pivoting discharge deflector	Discharge deflector pivots up allowing cutting wheel to grind below the ground.
High speed cutting wheel	Cuts faster with less vibration.
Permanent hose holders	Hoses aren't zip-tied to the frame. Zip ties can break over time.
Replaceable carbide cutting teeth	Cutting teeth can be rotated two times before they need replacing. Cutting teeth are easy to replace. Carbide tips for extra long life.
Hydraulic hose lines	Hydraulic hoses absorb shock. Steel hydraulic lines crack from vibration.
Commercial grade gearbox	Durability with 2yr warranty.
Cutting wheel designed with wheel puller access holes	Makes it easier to pull the cutting wheel off of the motor spindle.
Attached rain tight manual holding tube	Keeps manual with Stump Grinder for quick easy access. Manual won't get wet.
Offset articulating arm	Allow for optimum line-of-site from operator's seat.
Slip clutch driveline	To protect the gearbox and driveline when coming in contact with something solid.
Cat. I or Cat. II hook-up	Allows different tractor set-up.
