

STP25

| Features | Benefits |
|--|---|
| Universal quick attach mount | Fits a wide range of skid steers. Easy to hook-up and unhook. |
| Heavy square tube frame | 3 1/2" lower and 3" upper main frame tubes provide good strength. |
| Optional push bar | Keeps limbs away from cab. |
| 1 1/4" Main pivot pin | Large diameter pin spans upper and lower frame tubes to handle heavy work conditions. |
| Large jaw opening | Can pull trees up to 10" in diameter. |
| Greasable pivot points | All pivot points are greasable to reduce wear. |
| Cylinder shield standard | Heavy duty shield protects cylinder and fittings. |
| Angled jaw tips | For digging roots and loosening soil around the base of trees. |
| Anti-slip access points | Prevents slipping while entering and exiting the skid steer. |
| Supplied with Quick Disconnect couplers | Many competitors do not supply couplers. |
