

INTELL-ATTACH™ SYSTEM

Available for: SVL97-3 with a Closed Cab, Hydraulic Hitch, High-Flow and Telematics

ACCESSORY

The Intelli-Attach™ System allows the Kubota SVL97-3 to intelligently recognize a Kubota by Land Pride Attachment when equipped with an Intelli-Attach tag. Once programmed, the communication between the receiver and tag automatically recognizes the capabilities of the attachment and adjusts the power unit to match. Real time feedback between the attachment and SVL97-3 helps the operator maximize performance and speed machine set-up.

The receiver (shown with cover off) automatically adjusts AUX flow. This prohibits high flow when a standard flow attachment is connected.

Tag is mounted to the attachment and communicates with the receiver wirelessly.

Use the MyKubota App to program attachment tag based on serial number.

INTELL ATTACH

COMPATIBLE

Standard or High Flow Attachments Required

Type	Model Number	Motor Options (GPM)	Part No.	Description
SVL97-3 Receiver	All Attachments	NA	701-256A	Receiver and Cover
