

# BB45 SERIES DRAG SCRAPERS

70-130 HP | Pull-Type

## Reshape country roads, waterways and terraces.

Land Pride BB45 Series Pull-Type Drag Scrapers are ideal for moving large quantities of material, leveling, and finish grading. Material can be transferred by dragging it to nearby locations and raising the scraper to deposit the load. Surfaces can be graded and leveled by scraping material from high areas and allowing accumulated material to flow under the grader blade into lower areas.

- 4" x 4" Square tubing main beam and tongue
- 5" Maximum cutting depth can load the bucket quickly
- Optional weight tray can be filled with 760 lbs. of concrete for additional weight when scraping and moving material
- Choose the tilt axle option for shaping slopes, terracing, or ditching. The tilt cylinder will raise one side of the drag scraper approximately 8" (7" on BB4596).

Vertical gussets for superior strength under side loads.
