

# DRG SERIES DRAG HARROWS

8-16 HP Min. | Pull-Type or Chains w/Pull Ring

## Smooth out sports fields.

Land Pride Drag Harrows are highly versatile in their design and performance. A harrow mounted on the drag bar with tines facing down and forward will deliver aggressive soil stirring action and deep penetration. Turn the harrow 180° with tines facing down and to the rear and you'll get less penetration with lighter cultivating action. Flip the harrow over with tines facing up and you get almost no cultivating action. Perfect for dragging a sports field or smoothing out recently cultivated ground.

The DRG Series can also be used in combination with the Electric Spin Spreader, Seed Bed Roller, and Disc Harrow creating the ultimate seeding package ideal for large grassy areas, reclamation sites, or wild game food plots.
